## PROFESSIONAL SUMMARY

Early-career Software Engineering graduate with hands-on experience in business analysis, process automation, and full-stack web development. Currently working as a Junior RPA Developer and Business Analyst, supporting digital transformation initiatives through workflow automation, stakeholder engagement, process mapping, and system analysis. Experienced in Power Platform, Python automation, MERN stack development, and data visualization, with the ability to bridge business requirements and technical implementation in consulting and enterprise environments.

## PROFESSIONAL EXPERIENCE

### **Cognitive Consulting Sdn Bhd** | Junior RPA Developer & Business Analyst

*April 2025 – Present*

- Conduct business analysis activities including stakeholder requirement gathering, process mapping, and documentation of current ('as-is') and future ('to-be') workflows.
- Translate operational and business requirements into automation solutions by collaborating with consultants, developers, and stakeholders.
- Supported the delivery of an end-to-end inventory and invoice automation system integrating WooCommerce, TikTok, and Shopee operational data.
- Designed and centralized inventory management using SharePoint Lists to consolidate data across multiple business platforms and operational sites.
- Automated sales data extraction and processing using Power Automate, improving reporting consistency and reducing manual administrative work.
- Collaborated in the development of Python-based automation scripts for processing sales entries and generating invoices within the ABSS accounting system.
- Contributed to the implementation and standardization of Smartsheet for project tracking, reporting, and team collaboration.

### **Petroliaam Nasional Berhad (PETRONAS)** | IT Intern

*October 2024 – February 2025*

- Developed a digitalized ETT approval form using Power Apps and Power Automate for the GHSE department, streamlining multi-step approval workflows and reducing manual processing.
- Managed and refreshed Power BI dashboards to provide timely and accurate training insights for internal reporting and decision-making.
- Supported internal digitalization initiatives by improving workflow visibility and operational efficiency.

## TECHNICAL PROJECTS

### **CommuniHub – Suburb Management Web Application**

Developed a MERN-based web application designed to improve communication between residents and management committees through complaint management and community engagement features. Implemented user authentication, role-based functionality, and responsive frontend design.

## **MERN Stack Capstone Project (KnowledgeCom)**

Built a production-ready full-stack application using React, Node.js, Express.js, and MongoDB with RESTful APIs, authentication, Git version control, and sprint-based development practices.

## **EDUCATION**

### **University Kuala Lumpur (UniKL MIIT)**

Bachelor of Information Technology (Hons) in Software Engineering | CGPA: 3.46 | 2025

Foundation in Computer Technology | CGPA: 3.90 | 2021

## **LEADERSHIP EXPERIENCE**

- **Vice President – Software Engineering Programming Club (SEPC)**  
Led student initiatives and organized technical workshops, including collaboration events with industry professionals.
- **Project Manager – Sustainability in City Campus**  
Managed a cross-functional sustainability initiative in collaboration with Alam Flora Environmental Services (AFES).

## **TECHNICAL SKILLS**

**Automation & Business Tools:** Power Automate, Power Apps, Power BI, SharePoint, Smartsheet, SAP MDG

**Programming Languages:** Python, JavaScript, Java, PHP, SQL, Dart, SwiftUI, HTML, CSS

**Web Development:** React, Node.js, Express.js, Laravel, Bootstrap

**Databases & Backend:** MySQL, MongoDB, Firebase

**Version Control:** Git

## **CERTIFICATIONS & ADDITIONAL INFORMATION**

Project Management (Coursera) | Cisco IT Essentials | Certified Swift Associate | Microsoft Cybersecurity Essentials  
| MERN Associate

Languages: Malay, English, French
